

Dear FCC,
Please do not block the attempt by XM Radio to expand their service to include local traffic and weather. This simply is not fair and just. Many of us left FM radio more than 2.5 years ago, because it simply has become too pop oriented, trite and full of bombastic advertising. It has been our choice to pay for a service that leaves out the BS and gives us something we love! So, don't cave into the special interest PACs, who see this as a threat. Is this really the Land of the Free? Get some backbone and do the right thing by allowing XM to succeed!

Sincerely,

Brian Herzog
